10. Vitamin C- 500 mg-
11. Liquid Iron supplements

Our free medical clinic gives necessary medication out to the people of the community, under the auspices of a licensed physician. Many of the infants and children seen have severe anemias, and chronic infections and inadequate diets due to their cultural taboos. We need all that is listed above, in those amounts to even keep up with the increasing demands of the clinic for just a few months.
