Johnny

- 1) Gene to lay out plant material for peanuts Monday A. M.
- 2) Gene lay out plant material for gardens Monday A.M.

and the state of t

- 3) Russell to test the compost for oil --see if too detrimental.
- 4) Test plant 1 row of radishes in the oil-soaked compost area

5) Jack make order for Tampala spinach from Yates in Gtn.

- 6) Greens, cucs, lettuce, chinese cabbage, eggplants, okra and radishes to go in garden with carrots in side area.. green squash growing now in plenty..
 - 7) Joselyn pick outlass from #7

13) Becky more on lab work with John Harris.

- 8) Make Arbors for the cucumbers and green squash--less fungus
- 9) Check with radio to see when pullet chicks coming out.
- 10) Take list left for Jack by Rob Gieg, and followup on Anthony
- 11) Citrus needs pruning and cutting of suckers from roots
- 12) Tanya take over care of coffee -- to receive training in this. Procedures ..
 - 14) Papaya crew-Ciney Newell, Dorothy, David Chaikin...verify with Jack.
 15) Plant 3 papaya per hole then cut out males later.
- 16) Christian to complete re-survey of fields by #; Darrell tell him to see Gene for additional information Christian needs.
- 17) Johnny asked for copies of new Farm Plan, harvest calendar and planting schedule -- Jack said Carolyn will get the information and make up the CAO copy.
- 18) To plant cuban black beans; store others; to plant way man at coop does.
- 19) Demo put bananas back in ground if fall and prop with forked stick.

 20) Cassava will crew to be re-established; select crew; tell Mary she should
- have been at meeting. This item was tabled.

 21) List of analysts, supervisors and on are who should attend Analysts to
- 21) List of analysts, supervisors and on ers who should attend Analysts to be given to Tish prior to rally Tuesday night. warnings will be written.22) Inspectors to write up corrections needed; copies to be given to dept.
- supervisors. This is not debatable as inspectors go through..

 (23) Jack will get with albert and get the wheelbarrows arranged for, possibly order some wheels.

Farm Analysts Meeting 3 September 78 , passes were along with series of Attendance: Russell Moton, Marold Cordell, Don Bowers, Gene Chaikin, Sarah Tropp, James Morrell, Guy Witchell, Shirley Swith, Eartis Jeffery, James Simpson, Pressedry Smith, Demosthenes Kutulas. Tish Leroy, Darrell Devers, Danny Mershall, Vicky Marshall, Geroline Kirkendell, Chris Talley, Carolyn Leyton, Jan Wilsey and Joselyn Carter. Got some of the plowing done today, first in long time. Gene Plenting to lay out plant material for the peanuss in the morning. Lay out the stuff for the garden. Plowed in a lot of pig shit this morning. However, was from the piggery compost pile that had a lot of deisel on it. Precedry commented he had noticed a lot of oil draining off of the stuff he got, when rains hit it. Tish commented that stateside they use deisel to kill weeds and grasses. Demosthenes confirmed: said he used a combination of deigel and kerosene and it killed the weeds for a year -- nothingrows when this is used as a rule. Russell said that most of the fertilizers are petroleum derivatives.. May not be relevant.. Russell was to have checked the compost with the deisel to report if it would be used ungardens and he has not done this. Now it is in the garden. The resolution Gene suggested was to plant one row in radiahes, a fast grower, and in 5 days we will know .. Rest that we are not planted is to go in the area where we have none of the composts Every Other Row in ohre suggested Cene.. Tigh had mentioned need for the salad greens, Carolyn Layton mentioned talking with Joyce T. on this. Analysts agreed to grow more salad greens.. the shading will be needed for the lettuce. Will alternate with chinese cabbage, which can also be used rew; is tender. Tigh asked about the Timpala spirach which reseeds itself and can be eaten yew and does not have the exalic acid erystals when eaten raw.. Gene says can order this from Yates in Gtn.. Jack to place an order for some of the meed. Metalon was against pees and Huns. In the regular garden even though Fermie is thring some suscess with them, These our later AND THE RESERVE be tried in the intensive farming. Amsell said our eggplant dring out now -need to have more plant till agreed to thise Would like more borns but last h crops flubbe with the begin, lettupe and subbage don't do well in full sun.. All agreed get in more quick arons --ere having to buy garden vegetables locally, leed shallots also. Cabbage takes & mo. have Greeks, coss, lettuce, chinese cabbage, eggplants, okra and maliches to go in garden with carrets in side area.. green ০র্নের প্রথমের প্রতিক্রাক্রামের grade grades per la plinty. កក លែខការដ្ឋ On said to get tracted in the other garden; one crop only in the West also divise that is poor in quality of the soil... Cutlass Jam says that is have enough outlass beens in Field 7 for 5 bags maybe, scooling to shook this and pick them.

The bottoning and bottoning transfer to the property of the state of the sta C-8・Qされなべ-さっ

Plowing Mike T. is to plow three fields and Jan gave the order of this.. first is the hill beside the scap factory. Joselyn feels should use the cutless as a rotation erop and plow under after picking in about h months..as green fertilizer.. Presently is not in the farm plan. Seemed to be a disagreement. を対けでは機能は、4000 between Jan and Russell on this issue... Cutlass subject to mosaid. Russell said only in small plots; he has not found this in fields. Jan said #5 on both sides were infected; Russell said was not that --was an insect that thrives In dry weather 12.22.00 Lettuce Gene said best when transplant, and use lot of shit and transplant late in the afternoon on a wet day.. Jan said use proper shading and won't be problem. Jan said best cues were on arbors and same with long green squash. Russell said it reduces the fungua, also other disease problems. Shirley to let Gene know how many flass he is to set out and the nursery will do it. Poultry Rob thinks is cleaner than has ever been ... Russell gaid when he went there they had disinfected one of the chicken houses and was just as it should have been ... Feed problem .. Jack thinks broiler starter best because does not increase the fat --down to 25 bags agg ration.. James M rrell in deficiency problems. Harris thinks they wight have changed formula on some of this - Rob is to check out when he is in town at the Siminar on chicken raising. Leaving on boat Monday morning, will be in 6th 7-8 for seminar; will go rest of way <u>ಎ.,ಎಒ.ಸಿ≭ಕುೆ ೧೯ ತ</u>ೆ೧೭ on the steamer. Rob is to leave list of what is to be done with Carolyn for Jack and Darrell to follow up. Not was instructed to have his hair trimed neatly and goget some fairly nice clothing. Derrell to lend something and he can J. J. C. S. S. S. call Boy to warehouse. Plowing Mike T. to plow the two back fields, lat at brick house, Field X, than #7 and then back field and eld squash field Jack will show him, After pennuts out of 15, Mike needs to go in and push roots. Total Bio sen wents springtime cultivator. Gene says no, will mess it up. La contraction of the contractio Memoris & Myslumtions.. being done by all supervisors. Allowing them to come In on Thursdays at 5130 and start them since take a lot of time. Interest? Tish and Gene challenged, Jack had raised original was and start and sention when Tours and Galenda and others had complained had no time to do their our maintenance as pool was pulling them always and from their own area. Demosthenes also. dense being been a let of bruning and cassave growing all over the ditron. Gene said leads trees all have to be out back and proper upon a lot have root suckers that need pruning. 2-3 days. The elique should now be moved into nursery rows and this will take a lot of time. Gene says citrus is Calenda's job. She said has some than can handle.

Cone says when it comes to planting Papaya should be planted by C-3-4-116 2-8 Carpara people with experience. Calenda now has citrus, coffee,

mixed fruit and orchard. Formerly was with Jan and Becky who are not now doing this.. Becky doing more lab on Dad's request and doing with John Harris.. Jan is an inspector.. 4.5

Jan, Booky, Gene and Galenda only ones know citrus...

James Morrell thinks should take coffee from Galenda and let

enother handle this. Jan suggested Tanya...who agreed to it.

James Morrell says on the Papaya, Ciney Newell, Dorothy B., Papaya and David Chaikin should in his estimation be on this.. Cane Crew did not like this. Feels with landscaping will need them. But

landscaping is nearly completed and should not require so much of his time... NOT RESOLVED...far as I sould detect. Jan said right now Tanya has rice and pineapples. Galenda is COffee

getting her crops more centralized except for citrus out on roadside.. The hindscaping will be farther along.. Mike will have to go in and take out the trees...

Gene thought cassave and papers in beneath that in 90 days ... PADAYA some places plant 3 per hole and later cut out the males and and up with better field.. Once up to where flower is showing is too big to transplant, and you end up with too many big

gaps in your field from the male plants. Burvey Rob Christian still has not completed the resurvey he promised Jack for every field. Carolyn has paper on it.. Darrell to Tell (

Christian to get with Gene for some information Christian needs. CAO's to receive copy.. Carolyn to make it up. Ram was recently in and said planting beans even though it is

late. Morell said this has happened before and Ram has only gotten hos of expected eropes Jan said okey to try on the cuben black beans, feels other seed should be vacuum stored .. all agreed to this. Jen said after talking to Calle Charan will have more input...went to see man at ecop and he is doing very well with his crops. Does not plant beens way government says, and he is doing best of all around. Jan will learn his method and we will try this with the black beans.

Sananas — Jen said that when Mike had gone thru a field and had knocked down he tree he had just got out, stuck it back in ground and propped it.. it growwell. We will start to try this. Demogthenes agreed to it. will try and see.

Gassava Mill Crew-to be reestablished; wants 7 persons.. Tanya said Wanda Souder, Loretha Buckley, Toi Fonzelle and Cleveland Newell were mentioned by Mary.. TABLED BEGAUS! MARY WAS NOT HERE. SHE SHOUD

Others not attending as they should be. Darrell is to give Tish list of persions who should be here! smalyets, supervisors and others who should be here every time; roll will be taken and unexcused absenttees will be given warnings in rally. John Manyis-item on agenda and he is not here. JOHN HARRIS TO BE GIVEN WARRING BON BEING ABSENT. WAS PAGED SEVERAL TIMES SAID JACK. John's agenda item was tabled to next meeting.

C-8-4-1115-8-3

Inspectors

Give copies of their reports to Carolyn who types extra copies for the supervisors. Decision best that inspectors not debate what they find with supervisors. write their reports as they see it independently and turn them in..

List time in which corrections are to be made.. Warning if not done. Jan will help them schedule the time to get it done with a crow.

not done. Jan will help them schedule the time to get it done with a crow.

Meelbarrows meeded said Demosthenes -- Jack will get with Albert and make decision how best to either make them, buy wheels, a
