This list contains updated information which, we hope, will help identify our loved ones still unidentified in Dover, Del. The additional information has been added in smaller typeface and so will stand out readily. We realize this information is scattered and incomplete at best and will supplement them as we are able. It is our understanding that the medical clinic at Jonestown maintained very accurate and complete records on all residents. Presumably these records will have been removed to Georgetown by the Guyana government. No doubt they will provide the best single source of identifying information if they can be retrieved.

Finally, we are compiling a list of relatives names and addresses. We have no way of knowing how accurate this list will prove as much of the information was gathered over a period of time and may be out of date.

NOTES

1. This list includes only the names of those who immigrated to Guyana from the United States. It does not include names of those born there or adopted there.
2. Under the heading of race we have sometimes tried to distinguish between "Black" and "Mulatto" and "Caucasian" and "Latin American" or "American Indian":
 - B = Black
 - C = Caucasian
 - I = American Indian
 - L = Latin American (Mexican, Puerto Rican, etc.)
 - M = Mulatto
 - O = Oriental
3. Included herein are all the names of those immigrated. Those known to be already deceased, rescued or identified as among the dead have not been deleted.
4. This offering is preliminary. As soon possible we will submit a list augmented by information as noted across the top of the page.
