In response to Mr. Nellis' inquiry, the FBI is aware of large quantities of controlled drugs found at Jonestown, Guyana, following the incident which occurred there on November 18, 1978. An investigation has been instituted to determine the source of the drugs and the nature and extent of their use. The drugs are currently in the custody of local authorities in Georgetown, Guyana. To date, the source of the drugs is not known. Investigation at this time indicates that all drugs were probably used by the inhabitants of Jonestown as opposed to commercialized trafficking in narcotics. (u)
