Memo Monroe to Mr. Young  
Re: INQUIRY FROM THE HPSCI  
REGARDING JONESTOWN, GUYANA

By teletype dated 1/28/81 (attached) <sup>with attached + handle  
esp.</sup> the  
Los Angeles Office advised that a review of their files  
disclosed that on 12/14/78 a former FBI employee admitted  
taking certain documents from our Los Angeles Office while  
employed. The former FBI employee subsequently turned the  
documents over to an attorney. The attorney advised that  
one of his former employees, who was also a former People's  
Temple (PT) member, possibly copied the documents and  
caused them to be transported to Jonestown. A document  
found at Jonestown indicates that the attorney's former  
employee discovered where the attorney maintained the  
documents which he received from the former FBI employee  
and made photocopies. The recovered documents revealed  
the identities of nine FBI informants by name and referred  
to four FBI informants by symbol number. The informants  
were made aware by the FBI of the release of their identities  
to persons outside the FBI. The informants who were  
identified were not at that time furnishing information to  
the FBI. The U. S. Department of Justice was made aware of  
all details regarding this investigation. (u)
