12 December 1977

Dear Comrade

With fair and pleasant greetings I extend to you and all members of the Peoples Temple Agricultural Mission as on this occasion I wish to inform you that I am all engaged in keeping a leg with my sick & aches relatives who are suffering eye ailments. My son brother who is affected with paralysis suffering with a crippled right hand so great his condition is that I had to have my time taken up in keeping a hand of him to cause his condition from which I am some how relieved in mind as he is prone to be improving. To this due position of his illness I find myself greatly frustrated with the necessities of life but with the honest trust and faith in the love of Christ, my one I am striving with all hopes to live my entire through with the peace of mind and trust in the embracing helping with the true faith in Christ now that in hope the good Creator would be with me even unto the end. Please may I kindly ask that should it suit you to forward one with the coming year 1978 calendar which I would be truly grateful as I may also have it known that due to the fearful burnt out that the people suffered at the La Grange Avenue I had was simply under the being of the deplorable position that they were placed in. I could do more anything else than to meet up this requirement with the good parcel of clothes that I had received from the two good ladies that had brought it fairly safe to me which I could see that it turn to seem a pretty helpful purpose with Peace and love in Christ. <sup>Yours truly</sup> Thomas Perry

Dear Paula,

I have just today received a most gratifying letter from you U.S.A. H.O. I think it was the nicest thing one has done for me for a long time, in that you took the trouble to report my helpfulness to your organization. You need not have done this for this is my normal attitude to anyone of <sup>our</sup> any countries who might be in urgent need for our services. However, please know that I am indeed very grateful to you for going so far to express your gratitude for the service rendered, and I shall indeed be happy to be of service at anytime. Please feel free to contact me again at any time for any assistance.

Sincerely

Muruga Khan

Michelle,

How is everything going (do me a favor and not answer that question as the answer will not make any sense without context)?

I am forwarding this nice note on to you from one of our cohorts from the O.R. who has a gap between their front two teeth (which was my only retaliation)? My return note had only two words, "Buzz off".

I would like to know if you have filed any of ~~the~~ receipts I left for you. Do what you can with them because I will have a new big pile for you next week. It is important that all of these things get caught up to date.

Daisy, the Georgetown addition to our family who is also a rice mongrel, sends her greetings. She has mange bad so the guys are supposed to get some old oil to soak her in. I yell at her when she scratches because on one leg the first layer of skin is scratched off. It's really bad and she can't sleep at night it bothers her so much.

All for now.

EE4AAE  
Affectionately, Paula
