Livestock & Agricultural Commission  
and PEOPLES FORUM

29 August 78 Tuesday 7:30 PM

Chairperson: Gene Chaikin
Secretary: Tish Leroy

1) Plans for the Intensive Farming — Chaikin
2) What’s happening at piggy — Gay Mitchell
3) The Orchards — Glenda Polite
4) Plans at the Chickenery — Rob Gieg
5) Banana Cultivation — Demosthenes Kutulas
6) Farm Manager Report — Jack Beam

Followup:

1) A request by dad was made to know how people spend their time so they can be released from tents; those who have projects and extra work nights should turn in their time on this. who is coordinating collection of this information for dad — he addressed it to those handling the testing, it sounded like...

2) What has been set up for the Russian classes—Professor Roller and Dick Tropp?

3) Has a demonstration performance by the Karate Team been scheduled for public rally as requested? When will this be shown in reference to those they want to send to Georgetown for competition or performance.

Johnny — I added the following to Dad’s agenda...did not want it on the one down front...

The items from Rob Gieg’s letter were covered in analysts meeting — quite satisfactorily. There was merit for some of it and against. Harold was distinctly cleared and it was determined Rob was Harold a public apology. We are dealing with the paper work, although it came out that Rob had not been doing his, even the rotational work on the test feed programs at the chickenery...and he agreed to start with this. However, there is too much paperwork — not all of which was asked for by either accounting or the GAO’s — and we are meeting to pare down what we can on this. The analysts and farm inspectors are spending 6 hours a day with their crews in addition to their other functions and work. Rob brought the memo and all points were covered. Johnny gave agriculture 3 days from Monday to pull it all into line. The ADMINISTRATORS HAD ALREADY PERFORMED THESE FONCTIONS—both on the paper work and the inspectors spending too much time in the office and in the last ACO meeting analysts were instructed to deal with it...this was prior to ROB’s letter to you. The administrators are functioning well for ‘time they have been in — Tish
August 78 FOLLOWUP FROM ANALYSTS MEETING

1) Russell to make up copy of notes to go into Mon Repos for information needed for farm.

2) Charley to see that Cassava mill stoves are fixed.

3) Darrell is to note if supervisors are prompt and getting in reports as should be on daily basis and to write them up if don't comply.

4) Have Georgetown contact Dr. Reed through Mingo and see if we can get some of the Santa Gertrudas heifers—try for 20—or many as can get.

5) Compost structure to be built at piggery; analysts to visit and select site. Must be completed by next analysts meeting.

6) Richard to get the measuring tapes to estimate weight of cattle and pigs—Proks to push daily on this.

7) Slaughter schedule for pigs and chickens to be made up by Joyce and Jack.

8) All analysts—inspectors are to be working 6 hours daily in the fields.

9) Agriculture has 3 days to get their department in order or entire dept. will be on the floor—including work patterns; supervisors and reports that are to be done.

10) Weekly breakfast meetings for crews to be initiated again starting this week.

11) Daily reports to be in or supervisors to be written up.

12) Tractor drivers to be told not to cut new paths with tractors and tear up fields. C. T. was advised to inform his drivers also.

13) Trial fertilizing of pastures—10 day test to be done; measure off one acre and fertilize. Check if healthier in 10 days.

14) Small animals to have more greens; person from small animals to go out with tractor in the mornings on regular schedule.

15) Christine Tally to get Bob the research information on the rabbits.

16) The 5 sows to be kept as brood sows are to be kept bred and in use so won't lose fertility.

17) Test out the landracer to see if fertile; Kautuck to be used for breeding as looks better bear.

18) Have Ben and Kentuck both at this point.

19) Outlaw sharpening program as advised by T-Grubbs to be initiated.

20) Johnny Jones to talk with Joyce on using up canned milk and damp flour; also with Ben and Joyce re full cream milk powder vs carnation—$1.22 vs $3.90 says Ben. How is the wet flour to be used?

21) Check U. S. on the fuel storage tanks (neoprene plastic)—any So American contacts? Richard to contact the consulates for information.
22) Cutlass beans to be picked as they turn and taken to cassava mill.

23) End of day supervisors meetings in Ag office to discontinue; supervisors to have reports in by 7:30 next morning and reports to be done on own time.

24) Freeze in charge of Herba; to do reports and planning and get help as needed from pool.

25) Further research on pasture to be done.

26) Rob Sieg to start turning in his paperwork has not been doing it but complained it takes too much time...

27) Russell to be on intensive farm committee and in their meetings.

28) Russell, Jan, Hugh F. and Chuckin to go to visit Kalle Chanan and learn his family-farming methods; arrange to trade something for the 5000# of corn he has to trade with us - fruit trees, or...
LIVESTOCK & AGRICULTURAL COMMISSION
and Peoples Forum
22 August 78 Tuesday 7:30 PM

Chairperson: Russell Motan
Secretary: Tish Leroy

1) Organic Farming — Gene Chaikin
2) Report from the Piggery -- Garry Mitchell
3) Poultry report -- Rob Gieg
4) Nursery and Orchards — Glenda Polite
5) Growing Bananas — Demosthenes Kutulas
6) Bricks — Jack Barron
7) Report from the Herbal Gardens — John Harris
8) Farm Report — Jack Beam

Followup: Is being handled by the farm analysts and has been assigned.
FOLLOWUP from People's Rally of 19 August '78

1) Must find the man who got charged with homosexuality: accused of approach boys on the street. MILLER. He wrote and said not satisfied with your answers. The Burton Brothers. I went to the editor of the Chronicle (JJ)
He mentioned in passing knowing that I, JJ, was the victim of conspiracy also. parallel with other one. Four days later they hired a P. R. firm. They were there to murder Unica Wright and us... Had a large satchel.

2) WATER FOR DAD --Shonda should assign a white person to carry his water on the tour and around him... cannot have it appear using blacks in servitude and might be thusly interpreted. Dad sent two messengers up to stop the music and they didn't do it.

3) Band pay attention to those around Dad -- take messages he sends up... Play softly between lead performers.

4) Typewritten form needed for Dad on EVERY DEPARTMENT TO BE VISITED ON THE TOUR so he can rehearse it... comment things made out of scraps, stress the trades blacks are learning here that they are not permitted to learn in the states because of racism, such as tool and die.

... That our seniors have usefulness -- training our youth and providing goods for country that will be much needed. Etta Thompson was in the movement in the states and picketed. Cleve Swain teaching tool and die a genius whose master skills would have been lost... going to teach over in Ridge... much machinery down here because blacks and people of color had been prevented from learning maintenance skills on the heavy equipment...

5) Remind Dad to do rendition of the opium wars.

6) Clara and Grubbs to teach us memory drills.

7) Dad wants answers given with the questions.

8) Assign someone to make the announcements -- a person to be there on every shift to make all the announcements -- low key and with discretion and sense of timing. Cut as many as possible. Do as many with running and personal contact as possible. Do no yell or scream, and watch tone of voice. Don't get on there angry.

9) Assign someone to rehearse Bruce on what he is to say about the people in the machine shop when Dad introduces him and tosses him the ball. Charlie Touchette should be in on the tour.

10) We have a participatory democracy: departments for everything, but all comes to the people once a week in People's Forum for decisions... Diane

11) Wants song about Guyana and national anthem.

John: Remember not to write
in lawyers' names.
1) From what he said about the reporters, first said that he --Jim--would have to lead...then named Johnny, because he said that Goodlett would be expecting to talk to him and there'd be hell to pay if Jim didn't give Goodlett the time. So sounded like he'll be with Goodlett and you'll be guiding the news tour. You might want to confirm.

2) TOUR: Johnny, Chaikin, Jack Barron, Russell (must speak up), Grubbs (he is to brag on black principal and Clara is to brag on the white principal --tom-- and someone else point out they are not married to each other so no need for them to be like that.) John Harris on the herb table --say did Pathology in College--Sarah, Caroline and Lee also on the tour...Jan Wilsey speak out more.

3) Chaikin stand by Dad's side (I presume whenever around reporters) and Sarah be there too...she is a lawyer--got degree if not the license. She needs to talk about role as farm administrator as she's not comfortable with that...

4) Mention David, and Amerindian children. Need an engineer on hand to speak about the road and what we are doing --some place in the tour when we come to him can ask about it...

5) Who's going to be talking to Fred? Joyce Parks could handle the dinner? Wanda King? Hugh Fortson. They want certain medications for him.

6) Tool and die--point out the people who suffered under the U.S. racism. Some lived under slavery, been beat on, shot innocently (Gordon Lockett), by police...saw families lynched and didn't dare look or would have been hanged with them. Whipped in racist sentiment.

Mention meat every day; fruit, foods of many kinds.

Black companions to be with the light-skinned ones at the luncheon.

Jim, Debbie, Paula, Mike, Paula, Harriet, Johnny, Carolyn, Chaikin, Anita, Jack Barron, John Harris, Russell and Jan. Terri B. should be in the tour with Kay M. and Fred. Dick Tropp--FRED'S HEAD IS WHERE DICK TROPP USED TO BE, SAID NERENBURG AMOS.

7) Meeting Sunday at 11 o'clock -- later about 3:30 the inspectors gather again to run through the place for final inspection and corrections that need to be made.

8) Make up list on people in Machine shop to Bruce to talk on...rehearse him. Mention Diane and what she came out of, prefers working here to a career...wonderful talent...likes mechanics, Ellinbee, etc...show what they are doing together.

9) Metal fabrication & Welding--Pitch and Jane to be more talkative, let it be worked out what you are making and planning to make --about the steam generator (must work out fuel), dryer, insect sprayer, etc...carriage...stress a great deal on making out of scrap...

10) Put male X for male and Y for female on the toilets...

11) If they ask about wages --what would I do with wages? Everything here is free...say we don't have preservatives in foods--mention sodium nitrate in all but dogs, mask and fish--sarcinogenic to high degree and cumulative in system. We have a participatory democracy...departs for everything but all decisions finalized in peoples forum weekly...
12) Diane to sing the song about Guyana... Band to play the national anthem... all stop and stand wherever they are. Men remove hats!

13) Praise Goodlett for his investigation on the U.S. Senate having gold certificates in the Union of South Africa—over half of the senators...

14) If asked how much land—say 3000 acres surveyed and cut lines, another acreage up to 27,000 available to us—can go to 50,000 available if we produce it.

15) THE PAJODA... Russell to see it gets done... son Johnny Sr. to also see it get done.

16) No barrier or gate is to be up at the entrance... see it gets taken down. Instruct Security at the front entrance.

17) Got money for project from projects, bake sales, offerings (not too much from this—most of that needed stateside) people like Jim have given savings toward it... his Mother (ASK DAD ABOUT MENTIONING THIS).

18) Doing for Guyana—free medical clinic handle over 100 a week... housing in town for those that must go to Gtn for specialists... free to them... our people in town care for them there. Free passage in and out on our boat.

19) Boats—have a boat, Cudjoe and lease a freighter, Albatross... Cudjoe was a national hero—first to fight the white plantation owners, later went with Offsey who killed self rather than submit to slavery; died in 1763... Burbage slave rebellion took place in 1763... Guyana has 83,000 square miles of territory.

20) We partially act as test center for Guyana—charcoal, wing beans, Cuban black beans.

21) Make reference to those living farther out—and reference to project sites 1 and 2 (don't say Camp 1, etc.)...

22) LIVESTOCK PLACE TO BE SPIC AND SPAN... DOES NOT WANT TO BE EMBARRASSED DOWN THERE AGAIN...

23) Be prepared to explain to them about the INTENSIVE FARMING OR ASIATIC FARMING... do not refer to it as oriental farming...
LIVESTOCK & AGRICULTURAL COMMISSION
and Peoples Forum

15 August 78     Tuesday     7:30 PM

Chairperson: Guy Mitchell
Secretary: Tish Lacy

1) Announcements from Steering -- Stephen Jones
2) Soil Problems in Tropical Agriculture -- Becky Flowers
3) Livestock and Piggery -- Guy Mitchell
4) Poultry -- Bob Gieg
5) Report of the Farm Manager -- Jack Beam

FOLLOWUP:

A. Did the teachers coach the children on "not say'in": they
don't like USA, etc. and that we are not pro russia, etc.

B. Did the medical department check on the distemper shots
for our animals?

C. Has the list been prepared of the persons to be included
when our guests arrive?

D. Did the health officer at the Ridge get contacted re the
Malaria salt? What was his commentary?

E. Did Georgetown send someone to talk to Wingo or call him
about getting us the concise and direct information on the
quantity of the chloroquill salt that we need daily or weekly
per person?

C-8-A-16
August 78 Peoples Rally -- FOLLOWUP

-- Dance on platform near the cottages when guests arrive; all participate.
  Sunday football, volleyball, baseball, etc. games.

1) Pagoda area--do what can be done. Any swings or other than can be
   placed there. Have children playing in the area.

2) Calling each other nigger is now a PSU offense, automatic.

3) Those that are older have to quit shouting at people and set an
   example of other than gangland mentality. Show warmth and kindness.

4) See that people quit calling the FRONT ENTRANCE by its former name.

5) Those who fail to take medications will be counselling with Marcy
   on her porch.

6) Put a lock on the bathrooms and only geriatric, etc. can have the key.
   Keep it open for Dad at night...his bathroom, that is.

7) All should be observing the band and those who go into town for us
   and who are radio room personnel... How political are they? How much
   social conversation are they engaging in? How is their attitude? Do
   they smile? Are they good with helping?

8) A group of the youth should be learning the gospel songs --they could
   do us a lot of good going through the Georgetown churches and performing.
   The songs of slavery are our roots, even through their biblical conno-
   tations, they were sung from the hearts of our people. They didn't
   come out of the white man's civilization...they came from our roots.
   They came out of our history and every one feels the soul in our songs.
   That could do us more good than any can realize.

9) Dad wants to hear from Lois about Mary Rodgers' weight every week.

10) Dad wants Georgetown told that they did a shoddy broadcast...did not tell
    then it was our music... was fiasco... You can't walk in 5 minutes before
    and have it come off as though it were prepared. Ellie did better when
    they were not coaching her.

11) Dad said the small pavilion MUST BE FIXED by time the guests arrive.

12) Teresa is to put a synopsis of tank on the blackboard for the test.

13) Teach the children to cry only over what is important. Reason with them.

14) Nurses are to take turns and tour the pavilion during service and see
    who needs to be relieved.

15) People here should write letters of appreciation to Frolich... He did what
    our own attorney would not do. HE PUT THEM ON NOTICE. They came back and
    said to Tim Clancy, "We'll get him."

16) DAD WANTS TO SEE THE TEST PAPERS on all that are passing and will be
    exempt from the following test...

17) Still need more to write up their stateside experiences; there will
    be special reward for those who do. Turn in to Jan Gurvich.
FOLLOW-UP OF ANALYSTS MEETING ON
AUGUST 11, 1973
AUGUST 13, 1973

1. JACK: Was the location for the cage referred to Jonestown Planning Committee?
   
2. Personally follow-up on this: Russell's time has to be scheduled and watched closely or things do not get done—Fiah suggested a schedule (check-in type), this is to be set up this week.
   
3. DARREL: Gene wants to start with some fresh seed from Gtn—this was not scheduled and should be done.

4. Did Gene get with Shirley to do a quickie plan by Monday 14–8–73?

5. Becky to re-schedule peanuts to whom has it been scheduled?

6. Has the planting of the radishes and greens started yet or when will it get started? Is to be done right away.

7. Russell is to make a list of specific suggestions of things to be done from the pathologist in Mon Roos) and to see that these are carried out.

8. Russell is to disinfect the machinery and tools—or show the proper people how it is to be done.

9. Has Russell given the proper instructions to Earnestine yet?

10. Has Russell explained to sprayers that greens are not to be sprayed in the heat of the day—that it destroys them.

11. Becky needs to schedule the underbrush to be out back out by citrus behind Dad's house.

12. Russell to make sure that sprayers are using the mister and using it correctly. (Sprayed the cottage area last week and was bad on the banana trees).

13. Carolyn Kirkendall to tell Darrel and Jack immediately in the future on anything that is not completed on schedule. Should have a time log for follow-up and confer with Jack daily to see what has been done and what hasn't.

14. Carolyn should make a log so that she can check all suprs. reporting in on what needs to be done in the field.

15. Russell is to be responsible for the chemical reports, is he doing this and checking with Earnestine each day?

16. Has list been made on task instructions for agriculture?

17. Has set-up been arranged for a training in-service program?

18. HAS Shonds and others been notified not to take guests thru garden area as has been done in the past.

3–8–0–17a
19. Has a resolution been set up yet with Safety committee and C.T. about the danger at the Cassava mill? Has people been given proper instructions each time they use the machinery?
20. Has C.T. fixed the stove in the Cassava Mill?
21. The scheduling with the x tractors needs to be improved— is this being done?
22. Is bananas being brung to piles, or is this planned to be done, evry so many feet apart, along the road?
23. Are supervisors getting up and out on the job to get their people off to work on time? On late mornings are the suor's, stressing promptness and to work hard and wake-up?
24. Did Darrel announce to all that any trees falling over should be kept up and should notify the banana crew of fallen trees? Front Entrance should be kept spotless at all times.
25. Did Darrel get with Tom Grubbs to set up the cutlass training program?
26. Is the Cassava down the road to be plowed under, if so when?
27. Has Rob and Jack figured out what they need in chicken wire for construction? Have they ordered it yet?
28. What did C.T. say about the generator for the pigerry?
29. Did Lee get with the person for instructions on contacting James Smith about pasture lands?
30. Has Russell located a new site for the compost pithouse?
31. Has Darno started his schedule of propping up the bananas yet?
32. Has the seed boxes and lath be completed? This is to be completed this week?
33. Have the rabbits been moved to the pigerry or chickery? If not has definite schedule been set as to when they will be moved?
34. Has any feedback on the weight tape came back form 6tm?
35. Has percise schedule been set up between Joyce and Guy as to the slaughter?
LIVESTOCK AND AGRICULTURAL COMMISSION
and Peoples Forum

C. 12 August 78  Saturday  7:30 PM  E

Chairperson: Jack Beam
Secretary: Tish Leroy

1) INTENSIVE FARMING IN JONESTOWN—Gene Chaikin
2) Soil Problems in Tropical Agriculture—Becky Flowers
3) Report of the Farm Manager — Jack Beam

FOLLOWUP:
A) Is the road moving along with the scheduled cosmetic changes?
B) How near to completion are the model cottages?
C) How soon will the macramé hangers and the paintings be completed and put up before guests arrive?
D) Did the bamboo cups get started? Ken Horton and Tom Grubbs were to get together and a committee to work on it was named.
E) When will the 6 cylinder engine be put in the pickup truck?
F) All were to be SMILING CONSTANTLY and making the "V" signal to each other — still not being done enough. Need more smiles and V's...
12 August 78 RALLY FOLLOWUP

1) Be sure to use the term "community" in place of the term "family."

2) TEACHERS TO COACH THE CHILDREN:
   Do not say you "don't like the U.S.A." -- rather, just
   say that you like Guyana "better" than the U.S.A.
   
   If they ask if you are a socialist, say -- what do you mean?
   If you mean how we live here, that's what I like. I like our
   life style here.
   
   No -- we are not pro Russia or pro China or pro anything... 
   We are for Guyana and we like the United States.

3) Dad wants distemper shots looked into for our dogs and animals.

4) Dad said that the only way we can be sure we won't betray is
   that we NOT INDULGE in the creature comforts that WEAKENED us and
   would have made us betray.

5) Dad holds all responsible when a senior gets in the news or test
   line -- see that they get moved to the front so they are not left
   standing. The medical staff should also be watching the line for
   any who should not be having to stand, also.

6) When the author of Parellax View gets here, Dad wants some medical,
   educators and the regular greeters and few others -- wants them
   around whenever he starts walking. They are to listen to his pitch
   and take their trend from what he is saying.

7) John or Lee contact the health officer in the ridge on how much
   salt we must have weekly -- or daily. also

8) Dad wants us to radio Mingo to get us direct and concise information
   on the quantity needed daily or weekly.
ANALYST'S MEETING FOLLOWUP
11 August 78 -- 9:30-12:15am
Friday night

Agenda:
1) Anteater cage and location
2) Garden planting—serious problems
3) Problems with Russell's follow through
   a) disease transmission, field to field
   b) spraying not being done
   c) sprayers not being taught correctly
   d) paper work with Harmestine incomplete
4) Need to rotate garden tour
5) Cassava Price and Safety Committee and C. T. challenge
6) Tractors in major coordinate log with jobs that need doing.
7) Bananas looking terrible and 1 week till guests arrive
8) Training program needed for use and care, of cutlasses
9) Cassava down the road to be turned under
10) Garlic vines.
11) Where are we on 3 week planting schedule?
12) Moving fence at Chickery—replace with barbed wire.
13) Purchase of 500 white leghorn layers? (as chicks)
14) Followup list
15) Seed orders to go thru Chalmers, Jack and then to FER.

ANTEATER Cage: The anteater is digging down a foot a day where he is presently caged. Gene wants to donate him to a zoo in Gtn. We are not finally in any position to build a zoo at this time, and we have a lot of problems because of this—now do we anticipate the financial costs of a zoo being practical until we have a balance achieved between income and expense in Upper., Our move should be to cut all extra projects to cut expense.

Location for the cage was referred to JUNECO/G PLANNING COMMITTEE.

Garden Planting: James Morrill stated that the garden is in a disastrous situation—worse than he has ever seen it. Must be some planting done, and must be done now. Shirley Smith has recently taken over charge and care of the garden, but this has been in the rainy time when she has had little time to get it straightened out—she inherited a lot of problems.

Gene originally came up with a plan and we had one of our best producing gardens when we first started out said Jan., thinks he should help plan another. Gene committed to help Shirley with the paper work. However, we have major problems with the present soil said Gene, it is ridden with disease and bugs.

The new garden site is for 9 acre parcels and we cannot get on the until paper files planting. Morrill feels that we can get some things planted in West Garden in the bottom area, and even something in is better than nothing. Must use more natural fertilizer—Seed transportation and the rotary plow to turn it under. Shirley
requesting chicken manure. All to be put on the new garden area and turned under. Can go down trails and turn it under later as we get it.

James Morrell changed his point in time we don't have a garden and asked, "are we going to wait 2-3 weeks more to start this?" Russell said that the only thing holding it is the tractor that is down...THERE WAS A LEAK IN AN OIL LINE AND WE LOST AN ENGINE ON THE TRACTOR. IT BURNED OUT FROM NO OIL...it wasn't said if there were gages that should have been watched, checked, etc? This happened Friday, today, the 11th.

Simpson wanted to know why not planted in greens? Could not get it plowed... Russell wants to spread the compost on the new area and get it turned under.

James Morrell feels we should spread it on a specific size plot of ground, so that enough is used -- and then plow like it should be done rather than half-assed. Morrell feels must get something in to keep land producing. All generally agreed with him. Gene commented that the plan must be done before the fertilizers -- that you fertilize differently for eggplant than you do for greens than you do for beans... Gena to do a quickie plan with Shirley on this by Monday.

SHELLEY SMITH HAD BEEN ABSENT FROM THE MEETING AND WAS PAGED BY JOHNNY TO COME IN...She arrived at this point in the discussion...

Gene feels we should go down to the new acreage and start fresh. He says that he has never seen such disease since he has been here. CHARLIE AGREES and added that the farmers down river only plant their fields 5-7 years. At 3 years they begin moving to another site; the old area is "used up" in 7 years. MORRELL POINTED OUT THIS WILL NO LONGER BE THE CASE WHEN WE DO THE INTENSIVE AGRICULTURE, but it is a condition we are facing now on the present grounds. Is too much accumulated disease.

Gene wants to start with some fresh seed from Georgetown.

Coffee too much for Shirley -- In the transition, Shirley was handed the coffee tress. It was decided this should go back to the orchard crew. They are trained and equipped to deal with it and the garden crew has too much on their hands getting our fields back in shape. Will start the new garden fresh on acre or 1 acre plots.

Shirley expressed she felt they were blaming her for what she described. IT WAS EXPRESSED TO HER THIS IS NOT THE CASE. SHE REALIZED SHE JUST TOOK IT OVER...

Ian says he wants to put 5-month cassava in the old garden area until the are ready to put in the rest of the housing.

Peanuts, Beans, Turner, Cassava and fields, said that she cannot
handle the peanuts that had been added to her schedule. Becky is to re-schedule this.

2½ to 3 months ago when the Mon Rano people were out here, we were talking about the disease. Nothing was done by Russell on this.

WE HAVE NEED TO GET IN RADISHES AND GREENS NOW. Morrell suggested we immediately put some manure on the 1 acre plot and put some people to be in charge of it and get some really good garden growing on that land. Agreed it should be done.

Russells Problems—Jan pointed out that again we are having real trouble resulting from Russell's failure to follow through.
In a meeting some time ago, Gene, Russell, Becky and Jan set up procedures to be done to stop the transmission of disease from field to field; this was originated in an analysts meeting and carried out in sub committee. It was Russell's responsibility to see the procedures than outlined were carried out. He has done NOTHING AT THIS POINT... It has been quite a few weeks probably going on two months since this was set out.

Russell felt he had problems that blocked him, but he did not report back to the committee on this. The Mon Rano pathologist told us how the garden was going on it was down and down... He made specific suggestions to be done. It was Russell's responsibility to see this was carried out.

He failed to get to the crew supervisors to show the insects; he didn't do the disinfecting of machinery and tools; he didn't do the seeds... he has not treated one seed, in fact. It was decided we should be selective in the seeds we get from our own planting material. Further, he has not given the proper instructions to Earnestine. Green are being sprayed in the heat of the day and Russell did not get through to them that this kills the plants. It burned them up. The citrus at Dad's house now looks bad. The underbrush needs to be cut back. On citrus behind Dad's house, Russell sprayed it. The field people said they were told to leave the grass and brush around Dad's place because the security was going to take care of this. Gene mentioned that the path of citrus is just for a hedge! We used rough lemon which is very thorny deliberately as security planting... Is to be a hedge. Yesterday, they sprayed all of the cottage area and the way they did it was VERY HARD ON THE BANANA TREES... were supposed to have used a mister and did the spraying with a full stream... was hard on the trees. BECKY TOLD THEM SPRAY ONLY IN MORNING AND EVENING and this was not done. ELMER'S INSTRUCTED TO GET HER INSTRUCTION FROM RUSSELL AND SHE SAID THAT SHE HAD TAKEN HER INSTRUCTION FROM RUSSELL. Becky said that he had told her to use mist sprayer, not to fill out the schedule... This is Russell's job. CAROLINE KIRKENDOLL IS INSTRUCTED TO TELL...
Darrell AND JACK immediately in the future need anything that is not completed on schedule.

The young beans are just coming out of the ground, and if weeks ago told Russell spray needed and he did not take care of the problem, and THEY ARE GETTING RIDDLED WITH BUGS AND BEETLES. Russell's response was "I know it..."

Gene said they are spraying in the cottages, they are shooting about 75% of the spray on the cottages. They spray them with a stream instead of with a mist.

RUSSELL IS TO TEACH THEM HOW TO USE THE MISTERS. He has not been with them to check on their work. This just has to be done - immediately. He should have gotten BACK TO JOCKLIN... and she should have been complaining loudly to Jack that he had not...

ALL SUPERVISORS ARE TO HAVE A REPORT INTO CAROLINE ON WHAT NEEDS TO GO INTO THAT FIELD...

RUSSELL IS TO BE RESPONSIBLE FOR THE CHEMICAL REPORT. Earnestine writes down exactly how much is used - she should continue doing this in her INVENTORY RECORDS. This is chargeable to each job and should be turned in as such...

Caroline feels that there is need to have a list of instructions for every plant you spray. Written down. There was general agreement. Write down the tasks and how to do it. This should be done throughout agriculture. This was agreed. Caroline L., Harold and "fish" can help on the list of tasks. Did this in livestock and need it in agriculture. CLASSES ARE TO BE SET UP ALSO, in specific subject areas. Caroline Lavin suggested a TRAINING IN-SERVICE PROGRAM ON TEACHING PEOPLE HOW TO DO JOBS... Agreed this should be done. You must stay with people to see that they are doing it right - it is not enough to just tell them or show them once...

MOTION PASSED: TO DO THIS IN PROBLEM AREAS. Have the classes and the inservice training program.

Dan said cannot teach a new person every day... true but the key people CAN BE TAUGHT... then they can instruct the new workers as they come into the crew.

GARDEN TOUR: When guests come, we have been taking them on a tour through the garden. THIS NEEDS TO BE CHANGED UNTIL THE GARDENS ARE AGAIN PRESENTABLE. THEY ARE NOT PRESENTLY IN CONDITION TO TOUR. All agreed. Shonda and others should be notified.

Also there is a lot of scrubby stuff the seniors are into. Recommend raking it up and plow and let it lay fallow for a while... couple rows here and there.
Analysts 11 August 78

Senior Gardens: JOHNNY JONES said he has mixed emotions about this... He would hate to have this happen with all of this rain if we don't plan on planting back there immediately. "We can also see the part about taking it out and doing it right... It would leave a big gap... and then there is the F.P. thing we use about planting every square inch possible to food..."

NOTHING WAS RESOLVED ON THIS ISSUE...

CASSAVA PRESS, SAFETY COMMITTEE & C.T. -- FROM CAO's memo...

Demosthenes saw the jack fly off and hit one of our people in the arm and hurt him badly. "We were told that it was not being operated correctly," Demosthenes said, but he said he still felt it was unsafe. He said the committee felt that it could be fixed better.

C.T. said that Demosthenes wants a plate welded on top of it. CT doesn't feel that the place is dangerous. In the first accident, the person was holding onto the jack and even bending back the handle -- he applied so much pressure. It has only been since we operated it with P.T. people that we have had any trouble. When the nationals operated it, there was never a problem. It was our people that broke it. CT doesn't think it is dangerous. Anything can be dangerous if it is not operated properly. It should be pulled every 2 or 3 minutes...but our people think they can walk away for 15 minutes at a time...this is improper. They have been told how to use it properly.

STOVE...

Teena said the dangerous part of the mill is the STOVE... She feels it is very dangerous...Can easily get clothing caught and burned. C.T. said he would see this gets fixed... Is first he has been notified of it.

TRACTORS

Wesley came to the meeting to PROTEST THE FAULTY SCHEDULING OF THE TRACTORS...inasmuch of time and equipment. He said he feels we are properly coordinating the tractors and the work...not running too often enough and not considerate in the handling. He said he knew there were suckers to be picked up but Becky did not want him doing them. He had only the one day for the farm and he was not used properly...claims the supervisors do not realize the COST AND TIME VALUE OF THE TRACTORS. The farm supervisors ask the tractor to wait up 2 minutes for one person...leavin 20 people sitting in the trailer, resulting in 20 or 40 minutes wasted time. Wesley gets the trailer up there 10 minutes early so they can load as they finish eating. He checks it out and has it together well before 7 so he can be on time -- then they are standing around with tea, etc...after 7...nobody gets anybody to check on things he claimed. Nobody out there to send the crew down the road if the tractor has a breakdown. He knew there were lot of things to be done; he could have done everything on the farm list in one day -- but Becky would not authorize it. He used the tractor for garbage, etc., when could have been used for the farm.
Wesley feels Demon should have the crews bring the bananas to piles, every so many feet apart, all down the road. This would greatly reduce the tractor time required to stop and start, save on fuel and equipment costs, GENERALLY AGREED THIS IS GOOD IDEA.

C. T. says their system is wrong. If you have suckers on the road, you must get 2 or 3 people to go with the tractor and get them picked up...and there are suckers out there on the road now that Demon had said did not have to be picked up—and it looks bad. The cassava needs to be weeded and there are other things they need to be doing better.

60 people waiting for 10 minutes represents 10 hours. C. T. is mad because the supervisors were not on the job. SUPERVISORS SHOULD SET THE EXAMPLE and be the first ones to get their people out of the area in the morning. The other day work did not start till 10:10 but the supervisors let their people stand around until 11:15 before they got started to work. They are not getting in line early and are not getting their crews out early. The two mornings a week after the rally they should get themselves in gear and mobilize their forces to get on time and get the jobs done.

They should assist the servers to see they don’t serve past the 20 till 7 or firsts or 10 till 7 on seconds.

Becky said she went to Demo and he wanted to cancel the tractor for that day. It was to have been done Tuesday. Jack said he doesn’t want it to happen again.

C. T. said the bananas are beginning to look terrible and one week before the guest will be here. Becky is giving Demo 40-50 people to get them cleaned up tomorrow. Will take several days. It takes all the crews just to maintain the road—is 3 days work. The trees are down and are left there if they have bananas until they ripen. Some can be pruned.

C. T. SAYS THE FRONT ENTRANCE DOES NOT LOOK TOO BAD, AND IF THE BANANAS ARE CLEANED UP WILL BE PRESENTABLE. It should be kept spotless. Any trees falling over should be kept up and ALL SHOULD BE ALERT TO NOTIFY THE GRY OF FADED TREES...

Cutlass Training A program is needed and Tom Grubbs has an idea for this. Tom not here tonight—Darrell is to have Tom set this up for us.

CASSAVA IN ROAD Jan thinks it should be turned under. James Morrell says he should pull the sticks out first and then leave them to be plowed under—that way will not leave stubble.

C. T. asked about this vine. Jan reported we have no luck for the planting material. The leaves smell and taste like garlic. Have not been able to get any.

C. 8 2115
PLANTING SCHEDULE —Query where we are on the 3 weeks planting schedule.

They are so far behind on the plowing it is a major problem. Haven't rotated... finally got some done today.

Beans were to have been planted in the area... must not be too late to plant the beans... Says they are not able to plant them now, so they must re-evaluate and make a new plan for planting.

CHICKEN FENCE

Rob wants to move the fence back at the chicken to give them another 50 feet of ground. Wants to use some of the barbed wire fencing from here. It won't hold in the chickens, but Rob said they never wander anywhere anyway. (DOES IT DETER ANY OF THE SMALL WILD ANIMALS THAT WOULD ATTACK CHICKENS?) They stay near their pens.

EGGS

We are getting only 150 eggs a day and the kitchen needs at least 200 a day just for the babies and children. We got about 50 hatched out. Every time we seem to lose a whole bunch of them — this last time it was the generator that went out.

BUY PULLETS

Rob asked permission to buy about 500 pullet chicks day old. Last time priced they were costing $1.85 each. Then combine these with what we have. Put them in one building — then when we get the new building up, after aluminum comes in, put the pullets in the new building. At our present rate, we will not get our layers up by hatching.

Plan to use the 1st chicken wire to divide. Will have to buy more. We need what we have at the piggery to protect against the hawks. Will probably have to get the chicken wire out of Georgetown.

A BACKUP GENERATOR DOWN THERE IS NEEDED. Recommend we get the wire, the baby chicks and the generator.

After we get the chicks, will take about 6 months before they become layers. ASKED ABOUT BUYING LARGER PULLETS... GET IN TOUCH WITH RICHARD and ask if he got any information on pullets. Talk with C. T. about the generator.

FOLLOWUP:

Monkey cage

Did not get placed or located in park area. Not yet placed.

Cupric Sulphate? Russell started using it on the bananas... need to mix it.

Truck

Is here.

Daily Reports

Caroline says they are reporting.

James Smith

Was told to contact about the pasture lands and what we might do to remedy them... HAD NOT DONE IT YET... SAYS LEE... HE WOULD GET WITH SOMEONE AFTER MEETING FOR INSTRUCTIONS.
Pastures

Committee went down -- the pastures need to be re-plowed. Site not yet located for new compost house.

PROPPING BANANAS

Demos has a schedule set up but has not gotten it started yet. This must be started.

PASTURES

James Harrell commented that to fertilize the pastures now would probably not be best use of fertilizer, that the larger grasses that the cows will not eat would probably draw most of the nutrients from the fertilizer so it would be wasted. Said should put up some barbed wire fence, but this takes time and people we do not have just now.

Lathes & boxes

Jack has arranged the 10 additional seed boxes and the lathes.

rabbits

Rob is taking them to the Chickenery -- they have not yet been moved down there.

Landscaping

Not yet completed but Gene has done about all he can with the plants he has to work with. Was not counting on all of this so has to plant out what he had in the nursery. This is about all used up. Will be done by Monday with what he has to do with.

APPTS for Crew

Medical appointments are being given, the crews were wandering about and not being there when names called. It is now being called to pick them up for PSU if they are not there on time for their appointments.

Test Program

Guy said he got it set up and has checked with Harold on his paper work to see that it will be adequate.

Cassava & Cutlass

Guy was to figure schedule for the cassava tops and cutlass beans needed for his feed program. He got the figures done with Morrell and is getting with Wanda to get the weights and then will give to Jan for planning.

Meat Weights for live and dead weights on pigs and cattle -- We did get the radio message to Richard but he forgot it. He will do it when he goes back in. We need it in the test program.

Garbage

It is getting down to the piggery daily when they have it.

Schedule for slaughter -- They are setting down to figure next time to slaughter. Apparently a precise schedule is not done.

CHIPPER

The safety committee did post the safety rules on the machine.

Time/horn

The time is now being announced daily and the horn is blowing on time.
Hollowup notes from Peoples Rally

8 August 78 -- Tuesday

1) In future, try to bring in from Georgetown all persons involved when they are reported goofing up. Bring in also the person writing them up. Teddy was misrepresented.

2) Evaluations of stateside happenings and life situations in to Jan. Gurvich for the book! Even one incident written in detail can be important. --i.e., Joe Wilson when bus was surrounded by racists at Jack in Box in Santa Rosa.

3) Be sure Georgetown people know we don't want to go into courts at all only as last resort.

4) Get out of militaristic language; don't say "report" to radio room, etc. and all should respond when called in gentle terms.

5) Don't reflect on weather, food -- or where negative connotations could influence others.

6) Don't say, "Thank you, Jim." Rather, say just, "thank you."

7) Be prepared to talk to anyone that comes up and in the meetings, call on someone each time to quiz and teach...

8) What kinds of foods do you have? Coffee, tea, fruits, salads, vegetables and meats -- rice, sweet potatoes -- every kind of fruit you can imagine. Oranges, grapefruit, pineapples, mangoes -- we have peanut butter and cheese. Fish -- pork -- beef -- chicken. We cook some and we smoke some of our meats.

9) Refer to the rooms as "APARTMENTS"...

10) If they ask what happens if you don't follow the rules? Say that it is a community problem and is handled in our town forum -- we have a total democracy; everybody has a voice. We deny them few privileges for few days.

11) DO NOT USE THE WORD FAMILY -- because of the Nooney family, and the Manson family, it has a poor connotation to most U.S. people -- the capitalists have done this to weaken the family structure.

12) What privileges are denied them...? Well, movies, recreation, TV, etc. NEVER TALK ABOUT PUBLIC SERVICES. We don't categorize people. We deny them "some" recreation privileges. Some extra things they like to do we take away for a few days. THIS WILL BE THE MOST IMPORTANT THING ON THE TEST.

13) The way we get the wonderful behavior is to regard people for good behavior. We give special meals they can select for themselves, trips, records or something they want very much.

14) If asked why you came here? Because I wanted to. I didn't like the racism. I don't have anything against the United States -- my family soon will be coming here. However, we didn't visit that much when were there, so am not really lonely for them. I just love it here too much to go back...

15) If asked what kind of work you do... CAUTION IF A SENIOR... say "I keep up my yard... work in my garden... sew a little. Seniors aren't required to work, but I like to do some things. We have planned exercise and recreation time -- we have plenty to do -- or we can just relax when we want to.

16) What do you do with your money? What do you mean? I have my money -- but
you don't have to pay here. How much do I have? --REALLY!! that's my own affair. Really, money doesn't mean much here because you don't need money. I can travel where I want to... I go into Georgetown occasionally, and other towns on the coast.

17) I hated the pollution and the crime in the states. We had several robberies in our neighborhood and there was 3000 much crime. But it is like that in big cities all over the world.

The air is so beautiful here. The trade winds blow all the time and cool our days and nights. We have no earthquakes, cyclones or tidal waves here.

18) Snakes? We have none around here. We have never seen snakes, tigers or mosquitoes. We had a fly problem but we all got on them with our fly swatters. Now, they are greatly reduced. Right now there are more flies than we usually have.

19) We take a prevention against malaria in our foods.

20) Our health? It is very good. We have a clinic and a hospital; it is adequate... It is never all filled. Say -- I can't tell you how much better my health is... My blood pressure has gone down, my weight is normalizing -- I see better, have more vitality.

21) Church? --No, we don't "have" church here. We have town forum every week once, but never more than twice in a week. They don't like you to go if you feel bad -- we have nurses that check you and watch over any who aren't well.

22) We have a lovely warehouse. I got all that I want right there. We call it Central Supply. And, my loved ones stateside occasionally send me something. Everyone here gets the same treatment. If you don't have relatives that provide you with things, you can get it from Central Supply or they will order it for you if it is not on the shelf. All needs are met.

23) Recreation -- well, we have TV, cards, checkers, dominoes -- we have performances and entertainment, vaudeville types of things... we have special treats on Sundays: popcorn, candy, special cookies.

24) DO NOT SAY WE CAME OVER HERE TO AVOID CONCENTRATION CAMPS... MAKE "NO" REFERENCE TO CONCENTRATION CAMPS AT ALL!!

25) Do you have weapons? No -- we are a peaceful, non-violent people. We have always been peaceful. We don't beat or hit people -- we have no brutality.

26) Do you hunt for food? Yes, we go fishing, otherwise hunting has not been needed -- but we are learning about the jungle. You must go deep into the jungle to find the bush cow or wild boar -- we have bows and arrows.

27) Do you put people in boxes or bury them? No -- that's ridiculous. Those who went out have told terrible lies about us. Some of those people stole from us. Others wanted to do violent and revolutionary acts -- militant things -- we said no, and so they left the church.

28) Do not refer to Guyana as the "promised land" or "freedmland. Say, if asked why you came here and did anyone make you... Say, I made up my own mind...
I had heard about it from people who had been over there and returned to the States. It was far more than they had described it to be.

29) We should write to those back there. Tell them without spelling it out that they will gather what is going on (stateside) if they just read all sides of the issue... you are bound to see what is happening (the rise of NKK, etc.)

30) What's the tower for? --Oh, you mean the Pagoda... well, we designed it to generate electricity and have plans for slides coming down from it for the playground... there's nobody in it...

31) Do they tell you who you are going to marry? No... boy, you people sure are listening to a lot of lies... We choose to marry as we please and whom we please and when we please! We don't marry unless we want to.

32) Do you have security here? --Why? there are no fences here -- all of us know the free train, we know the engineer--we helped him and saved his baby's life, our medical staff did... Anyone can get on the boats going out of here. We have no security against our own people -- and are not bothered by intruders out here. So why would we need security?

33) No children to go in grassy areas -- there is great danger of snakes. The snakes will not go into our areas, They are coming out of the jungle due to the heavy rains and because it is so wet in there. INSTRUCT THE CHILDREN... OVER AND OVER... People aren't showing enough gratitude.

34) Dad doesn't want ANY DOG THAT BITES!! It is a matter of the attitude of the owner of the dog. They take on your disposition!

35) Do we talk of suicide? Do we take potions? --What? No -- of course not. We absolutely do not believe in suicide. It is a selfish act. Leaves terrible pain and guilt on those left behind -- it is a terrible thing to do.

36) What kind of schools? --We have the very best. We have an exceptional student-teacher ratio, also. Only 8-9 students per teacher here -- but back in the states they have 40-50 in a class. Our teachers are trained in child guidance, counseling, remedial problems, fantastic audio-visual section and we have a library of 20,000 plus books when we get all of them here that are around. We haveALL KINDS of books -- every subject you can imagine, including fiction, history, sciences, art, music -- every possible subject. We have all kinds of music, too -- from albums and tapes we brought over.

Our teachers teach people's minds and stress creative learning: they create logical thought and not just chance thinking. Our children are taught to reason and analyze for themselves.

37) Do the children have to work? No -- they don't have to work. Yes, we have a day care nursery. We have a lot of children from the outside, too... Some of our mothers are career minded and the best day care is provided their children while they are on their jobs or in training.

In the day care nursery, our children are there with good nurses, etc. They have games that teach perceptual motor activity... For instance, if you don't learn to crawl properly they don't develop good motor reaction...
8 August 76

in their bodies. The person who cannot control their body cannot control anything in life. It is giving the child the opportunity to succeed in everything in life.

38) The RECREATIONAL PLANNERS should have regularly scheduled games and cards, etc., going on the time he is here.

39) Even the remediation for a lot of education problems goes back to these skills.

40) Do you have art? Yes -- we have a lot of art -- and a lot of artists. Aurora, a Senior from our herbal kitchen, is a regular grandma Moses.

41) We don't force children to walk before they are ready nor do we toilet train them too early... we let them take their time and come into these things naturally. We give rewards but do not believe in making them feel ANY GUILT.

42) Do we have any bedwetters? -- not that I know of. Of course I don't know everything going on in the community -- but I haven't heard of any.

43) Do we vote? -- No, we don't vote in Guyana elections or participate in politics at all. We see good in all socialists and believe that every nation has nationalism. We aren't PRO-ANYTHING... We believe in cooperative living.

It is a form of the "KABUTZ." the Jewish practiced it.

44) We are not pro-soviet; we are not pro-China--we are non-aligned. We are FOR THE PEOPLE and want them to be free. We are not against the US.

45) Those that work work 8 hours a day. We have a lot of holidays... the country has holidays and we have weekends off. If they want to work extra hours, they do that. It is not required.

46) We have music playing in the partition much of the day, and it is played over the P. A. system during lunch time. SEE THAT THIS IS DONE!

47) We have plenty of meat -- rabbit, chicken, lots of pork, beef and lots of fish and occasionally something caught in the jungle -- soy, etc.

48) What is the function of the pharmacy? If they do not live with children, they have their own supplies -- but if children live in the house we keep all medications in central care... in the states there are so many medicine chest deaths... We take the medicine to those that don't keep it themselves. The pain medicines are all brought to them. We have community nurses that go through to each or them from door to door. We have no medicine chest deaths here.

49) We have never had a snake bite in our community because we teach people to deal with nature.

50) We have no preservatives in our foods and no artificial coloring -- our food comes to us just as nature made it... it is far healthier.

51) We don't sneak or trick people. We don't make fun of people -- we work for good character through positive reinforcement.

52) We are not religious -- we don't smoke or drink... not for religious
reasons, but for health reasons. The U. S. Health Department says that now it is even so conclusive with heart attacks and lung cancer and only about 4% of the people with lung cancer who don't smoke...

53) How many places do you know where there are medical house calls?

54) If they ask about joining us... say: Yes, you can join, but we have a long list. The man at the head of our livestock never belonged to our church. We have a lad in MANAMANAM who had never been inside our church. He got engaged to a girl here and came with her and loves it here.

55) Does Jim Jones live higher than the people? No -- he eats just the same as the people eat.

56) We get the news -- from BBC and Voice of America and some other stations, also the Voice of the Armed Service, Netherlands, England, Radio Canada... and we read the newspapers and magazines that we get.

57) Limited housing? -- well, not all live in the central area. Some are of recluse types and we have people living further back in the bush area.

Some like Tom Rice who can tell them. No, he doesn't want any visitors. That's why he lives out there. "I am just a loner and don't want any people to bother or be around me."

58) DO NOT USE THE WORD "COMRADE."
Rather, use the words Mr. or Mrs.

59) If asked where you keep your money... say, "Why, I keep my money..." It is perfectly safe here -- no one steals or thieves here. I have it secured... perhaps as I get to know you I may tell you where I hide my money...

60) If they ask if you have freedom of movement... ask: WHAT DO YOU MEAN? Well, I go where I want to. "Every week people go and come from Georgetown -- they go to Venezuela, Trinidad, Surinam for medical and shopping trips... and on one occasion we sent someone stateside.

ALL MUST KNOW EVERY DETAIL OF THIS...

61) If someone passes, we just call the person who takes care of deaths in Port Kaituma... and we bury them. We have been given permission in Georgetown to bury people here. Not many deaths here though.

62) ALL ARE TO DUMP THEIR SHOES before putting them on -- spiders and bugs...

63) Marital problems -- relationships -- We don't believe that in a community this close a man can go from woman to woman without a lot of trouble in the community. You can easily get a divorce here -- it only takes 3 months in Guyana law. We do have a code not to betray trust while in the marriage.

64) WE KEEP WANTING TO IMPROVE WHAT WE HAVE -- we plan to build a floor in our central pavilion so that people can dance -- we can dance on the dirt but it will be nicer to have a floor. That is planned for soon. We want to have more planting in our yards; we want to help the rest of the world with food -- we have plenty for ourselves.

65) Are there any complaints -- Well, I haven't heard any myself.

C-3-0-11e
8 August 78

66) ALL COMPLAINTS MUST STOP. Any who do not speak or smile must be reported.

67) If asked how we named our town Jonestown... TELL THEM: Someone in the
government named it JONESTOWN. No, we didn't have anything to do with
naming the community.

68) When you came did you think it would be for good? Yes... we were told if
we wanted to come back the church would not be in a position to pay our
way... We are not required to stay, nor are we promised a return ticket.
We were told that before we came -- many times.

69) We are trying to help make Guyana self sufficient... We are growing foods,
making bricks, soap, folding chairs, toys... we give free medical care...
Of course Guyana wants us to get our own people settled first...

70) In the U. S. there was no land available and here we can lease for 100
years and we don't have to deal with the crime and racism that you do in
the industrial countries. We are glad to help the U. S. in any way... but
our political views are varied. We don't make a difference about politics.

71) If Dad says PNC talk socialist...

72) Need schedule on John Harris... need him to work also with small animals
and spend "some" time down at piggery.

73) In future, consult with the doctor directly on the shots.

74) IS -- is to be called the NIGHT HELPERS or the DAY HELPERS...
J. T. Police to be called NIGHT WORKERS AND DAY WORKERS...

75) Give your original names when guest is here -- don't use your socialist
names such as Lenin, Che Guevara, etc.

76) All praises are to be signed.

77) Johnny Jones Sr. was to try to tape and record some of the comments
of the Guyanese about our brothers and sisters working together.

78) Weight watchers to work out the way to prevent double servings from
being given.

79) Under the Apartments, work place to be made neater and cleaner.

80) Medical department post so people can watch for early signs of cancer.

81) EVERY DORM to have a meeting and assign the chores to each person and
see that each one knows and agrees to what she or he is to do...
There is to be no favoritism.

C-8-32-16
LIVESTOCK & AGRICULTURAL COMMISSION

and Peoples Forum

8 August 78 Tuesday 7:30 PM

Chairperson: Becky Flowers
Secretary: Tish Leroy

1) Announcements from Steering --Stephen Jones
2) Intensive Farming in Jonestown --Gene Chaikin
3) Soil Problems in Tropical Agriculture--Becky Flowers
4) Report of the Farm Manager --Jack Beam

FOLLOWUP:

A. Is the dump truck coming out on the Jamida?
B. Did we get the Hollywood movie back to Georgetown?
C. Are we moving on the road on schedule to finish before newsmen arrive with the cosmetic finish?
D. How near to completion are the model cottages?
E. How soon will the macrame hangers and the paintings be completed and put up before guests arrive?
F. Did the bamboo cups get started? Ken Norton and Tom Grubbs were to get together and a committee to work on it was named.
G. Chaikin reports landscaping of unsightly areas is ahead of schedule and moving along well.
H. Tea is being served at night with volunteers and the sign in and out of cups as Dad requested is being done.
I. When will the 6 cylinder engine be put in the pickup truck?
J. ALL ARE TO BE SMILING CONSTANTLY AND MAKE THE "V" SIGNAL TO EACH OTHER. STILL NOT BEEN DONE ENOUGH. NEED MORE SMILES & "V"S...
K. Was the large black cat castrated?
L. THE WAP SITE FROM PLANNING WAS TO BE UP ON WALL IN PAVILION... is this done? If not when will it...
M. Is the crate warehouse scheduled for construction, Charlie -- or what do you have planned for the crates coming out?
ANALYSTS MEETING
5 August 78

Agenda:

1. Place to put monkey cage?
2. Discussion about Inspectors.
3. Replacements for Philip and Solomon
4. Cutlass Bean Fields
5. Pasture Progress Gery Mitchell
6. Weekly Week for Propagating Banana Trees
7. What is done with structure by history
8. Rabbit to be moved to piggery
9. Farming Schedule
10. Landscaping - Tom

FOLLOWUP:

1. Is Darrell doing followups on inspector reports?
2. Did the Inspectors check back to see followups done? Were they all done?
3. Are the agricultural "preference appointments" being given to the farm workers as set up?
4. Has Caroline Kirkendoll begun the harvest and planting registers? Where are these registers kept? Should they be in the Agricultural office where they are available information to the analysts?
5. Did the piggery set up the schedule for Becky on when and how much they will be needing cutlass beans for their feed program?
6. Did piggery set up records on the test-feed program? If so, please bring it in for Harold or TIsh to check it. When the pigs are ready for slaughter, we need to be able to figure which of the two programs was more costly per #.
7. Did Jack and Darrell talk with Joyce T., and is the garbage being sorted and sent to the piggery and being cooked with small amount of commercial feed for the pigs? If not, why not?
8. Did Joyce T. give Jack the amount of poundage she could handle in the freezers and smokehouse... and have we not got a slaughter schedule on the pigs?

If any problem on this, we need to know the daily cost per pig and Dad needs to have the information immediately. Every day past the slaughter time is costly to us - unnecessarily.

Did the compost pit get started? Was the chipper put into operation and the organic materials added to the waste?

Who is being trained to operate the chopper and has the safety committee been called down to inspect it and arrive at safety rules for it? If not, when will this be done.

What is happening with the tractor schedule for Charlie? Who has responsibility for this?

Has the proposal for AGAD been written up on tractors to Agric?
FOLLOWUP LIST -- Analysts meeting of 5 August 78

1) Did the monkey cage get placed or located in the park area?
2) What did Russell decide on the bananas... did he use the oil spray with copper sulphate on the bad ones, as our guest suggested?
3) Radio message to go in regarding the truck.
4) Are Russell and Morrell and others getting their daily reports in to Caroline K. as requested in last meeting?
5) Did Johnny contact James Smith at Aracaca?
6) Did the committee meet Wednesday and check out the pastures and locate a site for the compost house to be placed?
7) Demos to set up regular schedule for propping the trees -- is this done?
8) Did Jack arrange the 40 additional seed boxes and the lathe?
9) Were the rabbits moved to the piggery? Are they working out well there?
10) Did the landscaping Gene is assigned get completed this week? If not, what is the delay?
11) How is the medical preference for farm workers working out?
12) Did Guy get the test program set up? Did he check with Harold or Tish to see that paper work is adequate?
13) Did Guy and Morrell sit down and figure schedule for the cassava tops and cutlass beans for Becky and Jan?
14) Did radio message go to Richard in town to get measuring tape for the live and dead weights of pigs and horses... or cattle?
15) Is the garbage getting down to piggery daily as requested?
16) Do we now have an adequate slaughtering schedule set up and is the smoking process working for us?
17) Did safety committee post the rules on the chipper? Demosthenes?
18) Is the time now being announced daily? and is the horn blowing on time?

C-3-a-25
Analysts Meeting Minutes
5 August 78

Agenda:
1) Place to put Monkey cage.
2) Discussion about Inspectors
3) Replacements for Philip.
4) Guzlass Bean Fields
5) Pasture Grasses - Guy Mitchell
6) Weekly Schedule for Propping Banana Trees
7) What is to be done with structure by nursery?
8) Rabbits to be moved to piggery.
9) The Time schedule.
10) Landscaping - Gene Chaikin

Monkey Cage - The new monkey cage is to be 6 x 6 for our little monkeys. This will not fit under the eaves. Must have it relatively close. In the window opening? Put monkey cage downwind, suggested John. Gene is planning a park area from the poison shed down to Apartment 3. It is presently not planned for anything said Bob. Zoo will cost a lot of $$, water and people so not just now...

Plan to put monkey tentatively in the park area. John asked if we were bypassing the site planning committee - Gene said no, will be a recommendation from analysts to site planning and they will be meeting tomorrow. Charlie will be in site committee and the construction problems can likewise be answered.

Inspectors: When Jan is downriver, Gene will cover for her. Darrell feels should have more inspectors. James Horrell doing 8 hours daily but Finance meeting interferes some, and he is doing the physical therapy until Edith returns. Russell turns in report also. Query if Russell should be an inspector - no final decision on this. First yes, then questioned if his time permits. He is not getting in his reports said Caroline K., and this must be done. Becky is also covering for Jan.

Jack asked if we had started the oil spray the guest agronomist from Qtn told us about? No. He said add cupric sulphate to the oil. Gene said have not had the tractor time to spray. That is big bananas are main problem and should be replaced with apple and Gypsum.

Truck: Push to get the truck in here from Georgetown. RADIO MESSAGE R. TO GO IN ON THIS. The bulldozers were in town too long. Must go to Jamaika daily and stay on it talking with the Captain and making friends with him. That is how we got the dozers out finally.
Jans report — she said it takes only 2 hours a day to make entire rounds each week as it is scheduled. Some fields are hit once, some twice. Caroline K. said couple days did not get reports from Morrell and Russell. Supervisors are giving daily reports. Weekly schedule to Caroline then daily reports.

Philip's replacement: David George is trained for this also, but must get backup for him. Al Simon can be used. Will also train a sister. We have these three signed up. Chinese and Russians use woman for plowing.

Cutlass Bean field — decision awaiting the input from Guy Mitchell on what will be needed.

Pasture Grass: Guy needs some help. Our pastures are going down. Russell said can salvage with Urea and Potash till dry, then burn and plow and put TSP which cannot put in now. Decided more consultation is needed. Harold to bring in cost analysis he did from Gene's work. Asked for this by Gene. Gene got his information for this from a magazine in Puerto Rico, they have much different soil problems from ours pointed out Morrell. Wants us to talk with James Smith before he leaves. He originally told us to add trace minerals and salt to the animal feed — that is all they do. And, when we thought our cattle bad hoof rot, the person from Aracama said it was a deficiency and not hoof rot... and Jose Simon looked and told us to add trace minerals... when we did this, the problem cleared up.

* * *

Johnny to contact James Smith, farm manager Aracama livestock Assn and ask about the pasture grasses and what we might do for cheapest and best pasture grass.

COMMITTEE: Guy wants Russell and others to come down. Jim Morrell, Russell, Darrell, Jose, Harold and Johnny Jones will go down as part of this committee on Wednesday morning to check it all out.

Cutlass: Gene wants to keep 200# cutlass beans for seed. No objections.

Propping Bananas—New thing was to be tried. More than 8 trees down and have bunched on them. Try to use a wire or... Now with more cut trails they see more poles for propping. Should not be losing as many bananas as we are. Demas, mushroom has more poles in bush to bring out. Will get on this. INSPECTORS WANT DEMO TO ORGANIZE TO GET DONE REGULARLY. He is to bring in his schedule next week.

Structure by nursery: Pole structure — when and how to be finished. Waiting for alaskan sawmill to complete the cutting of lathes. It is to be a lathes house with partial shade. Have been promised Robusta seed. Gene to get 50 boxes and the lathes — got only 10 boxes, nothing else. JACK IS TO SEE CHARLIE ON THIS IN THE MORNING.

Rabbits: These are to be moved to the piggery. Has already been approved by Dad so can go ahead and move them, said Jack. Christine and Kari will alternate coming down to piggery to take care of them.

Couple of rabbits DIED and John Harris said saw enemia... in one and bowel obstruction in other. Lack of leafy green vegetables. Talked with Joyce T. Must be certain kind of grass or will give them diarrhea. RABBITS BEING MOVED TO PIGGY AREA. Dad should
Analysts—5 August 78

... be notified.

O Compost—Shad is designed, said Gene, and hopefully will be pole construction.
If we can find them will use Trolleys for the roof. HAVE THE WEDNES-
DAY GROUP GOING DOWN THERE PICK A SITE while they are there. Will
enable us to take out the manure and rot it at high temperature and
keep down the flies. Can use chipper and feed in organic material.

Landsaping—Gene has plans drawn and must do little more on it... advising
analysts will be large drain on labor by next week to get it complete
prior to the arrival of our guests. Will also need tractor, trailer
and auger for this.

Lee asked about community program on this—very hard to organize,
said Gene with unskilled help, much confusion, might be disastrous.
However, will check with Tom Grubbs for Jr. Hi students.

FOLLOWUPS:

A. Darrell is doing followups on the inspections reports.

B. The inspectors are checking back to see Darrell has scheduled the work.

C. Medical preference appointments—not working out well. ITEM FOR THE
   ACAO AGENDA. Teena said one of her people spent 3 hours 20 min
the job waiting for appointment.

   Also, one person went to Ave after Dr and Nurse said their excuse
   was NOT ACCEPTABLE. Job changes must be approved both by medical
   and Jack—this was bypassed. ACAO AGENDA ITEM. Jack needs specific
   examples cited by his supervisors on these items.

D. Caroline is getting some of the information but not all of it. Jan said
   they can estimate on the field potatoes, etc. No excuse not to do
   their paper work.

E. Figgery schedule for outback beans and cassava tops as needed so that
   Jan can plan the schedule for the fields. Guy has had problems to
   figure this—however, James Rawrell can help him work out schedule.

   We need control figures on the test program, and Guy is to consult
   with Harold or Tish as soon as he gets the program setup to be sure
   what he is compiling will produce the needed end result.

   Must have scale for pigs—or measuring hand. Tish to radio Richard
   in town and have him get measuring tape for cows and pigs both.
   live weight and dead weight.

F. Is being done. Will consult. See above...

G. Garbage—Jack and Darrell talked with Joyce who was cooperative, however
   people in kitchen mixed cans, etc. with it. Were not cooperative when
   Jack confronted them. Decision of analysts to bring this up in the

   PEOPELES RALLY AS AN AGENDA ITEM.

H. Yes—they are slaughtering and have been testing the smoking process...
   Will be necessary in the phase-down, since we have some now to be

   C-5-a-26c
slaughtered. 2 went for sausage, 2 smoked and ribs are done. Monday will slaughter 2 more hogs and 2 more regular. The Machinery Shop is making an apparatus for our grinder for making link sausages.

On those we butchered: the sows were 200# and 280#; the boars were 270# and 250#. Only the suit meat will need freezing; that to be used for seasoning. The hams, hams, ribs and shoulders will be smoking or sugar curing.

Will notify dad if any problems -- are trying to get this in step s.a.p. since many now already to be slaughtered and eating feed and waiting in line. If the smoking works, we can go ahead and get them slaughtered without the extra feed having to go into them.

I. The compost pit is being completed. Monday pull wood crew in and get the poles. Set and dry so can run through chipper. Demos-then-as- appointed from Safety Committee to look at the chipper and make up Safety Rules for it... will post on side of machine.

J. Tractor schedule is done. Becky took the responsibility and completed it.

K. ACAC Agenda item... details to be written by Chakin for proposal of transferring the tractors back to agriculture and give Charlie the new truck for transportation. TRUCK COMING OUT FROM CTN.

TIME

Time is to be announced three times daily from radio room. The people going off at 5:10 tell dispatch the correct time. Dispatch to announce the time at 6:00, 6:30 and 7:00...

Piggery Generator down--This week generator went out at piggery and no one went down to check on it. It came out that the 15 minute checkins were not being done. In fact — the piggery sometimes does not check in. Dispatch was called and Tim Jones came over. Discussion followed and analysts decided that the chamber night watchmen MUST CHECK IN EVERY 15 minutes. They are to do this to be sure they are awake. Johnny pointed out that this was set up because people had been sighted in that area, and it was a safety measure. The people could sleep days — so should not be asleep on the job. Imperative we have them check in: give them a warning and then if they goof -- put them on public services and make an example of them... word will soon get around. If they do not call in by second checkin time (3 hours) must send someone down there. Tim agreed to this. SHOULDN'T BE ON THE ACAC agenda if any question...

Voss will blow at noon and at quitting time: 6:00 on rally nights; 6:30 other nights. Dad later came on speaker and confirmed this... No one is to quit work until whistle blows. Carolyn said that as soon as some new cheap watches arrive in Jonestown, she will get three for the agricultural department.

—0—

C-3-5-26-5

21-5-17
FOLLOWUP: -- Peoples Rally 4 August 78

1) Dad wants the pineapples watched more closely; people have no right to be eating them individually.

2) "IB" should take note: CITRUS AREA IS OFF LIMITS and automatic PSU.

3) Someone in town to drum up business for the stake bed truck we are leaving there; probably Ujara will have to go in and get the business set up... will have to make the contacts and do a survey and set up the contracts.

4) Arrange for the dump truck to come out on the Jamida.

5) Dad says Carol put thru another followup message to Gtn on the draft animals. What is available in the very heavy draft type animals, oxen, jackasses and donkeys...heavy duty horses... Look also for pair of horses that are same size for cart pulling.

6) Dad wants Jan Wilsey to go back and get the promised pineapples, they said as many as we want... same on the cassava. And she is to arrange to take the peanuts to trade, also...

7) Get the Hollywood movies back into Georgetown.

8) Dad wants music played in the library.

9) Tish followup on getting the money turned into Gold... John maybe check on this, also.

10) Read -- MUST GET THIS DONE. JOHN SHOULD PERSONALLY CHECK on this in early morning to see what is scheduled to be done for the day -- and at end of day to see what has been accomplished... Stephen is cutting the legs and says can get them done... Mike says he can get them brought in... Said Enquirer using this against us...

11) Model cottages -- again, must be completed within a week. Someone should check with Ruby daily, and Ava or whoever else is coordinating this.

12) Macrame and paintings... Ava should check this through... and Lee... Nancy and Peter were to get some of this done.

13) BAMBOO CUPS—ask Ken Norton and Tom Grubbs to get together on this...

Committee: Bob Davis, Pat, Brenda Jones, Alfreda March, Arlindo Robinson, Edward Ford, Anthony Hicks, Patty Dennis, Chris Morrell, William Jones, Maurice Anderson, Steve Addison, Louise Shavers, Nicki Taylor, James Ford...

14) Is medical and dental turning in the persons to be cleared and profiles done before they are scheduled into town?

15) Chaikin is to complete the landscaping and gardens in around Veg. areas... and other eyesores locations... Dad mentioned area behind the warehouse that needs sheeding...

16) Tea at night. Volunteers: Dad wants cups signed out and in...

Volunteers: Ollie Smith, Rose Shelton, Marcus Anderson, Maurice, Constance Jones, Toni James, Marionetta, Birdy Arnold (cup washing)

Lou Esther Louis, Alfred James, Dorothy Rawlins
17) Get 6 cylinder engine in the pickup truck to go into town...
18) EVERYONE is to smile constantly and make the v sign to each other in passing. Remember we call Dad Jim when guests are around.
19) All eyesores must be cleaned up within one week. (note—the unfinished frame across from cottage 37 looks terrible with so much clothing hanging on it—can be seen from the air...)
20) Broom and chair to be included in the guest displays.
21) Cleve and Helen to go into town; Cleve to be going to the boat.
22) Philip to train for Captain and Solomon train for engineer.
23) The large black cat is to be castrated; is too mean and fights with all the other cats.
24) The map site from planning committee is to be up on the theater pavilion walls...
25) Dad said 100 crates coming in from Georgetown, "must work all night to build a warehouse..."—don't know just what he meant...
Minutes from Peoples Hall

Herbal
Shirley Fields reported on benefits of Collards, they are helpful in correcting obesity, drug poisoning and should be grown in great abundance for the many helpful properties.

Note: Dad had a comment on the pineapples. Some people are picking them without authorization. He wants this stopped. Jo should be notified and some arrangements made for securing them.

Citrus
Should hereafter be off limits—automatic PSU offense.

Shirley continued with her report... 1/2 cup of beef liver contains 5,900 units of vitamin A, 32 oz sweet potatoes contains about 7000 units of A. It is very nutritious and all should eat this wholesome vegetable.

Truck
Discussion arose as to bringing out the truck from town. Ujama was making 750 per day when he was in there on one contract he had arranged—there were other jobs, 312 could look in construction, hauling fertilizer, rice for Guyana Rice Board to the [illegible] docks and ships... someone needed to follow this up. He pointed out that once you have proved yourself reputable, you will be trusted with more and more jobs.

Someone commented on the Peoples Temple sign on the door of the truck—drew hostility from locals who feel we are taking work from the Guyanese... even though there is more truck work than there are trucks to do it. Touched-touched pointed out this condition has persisted from the start and will continue—so, we are Yankee foreigners and will remain so...

In discussing which would be the better truck for town, Ujama felt the stake truck best—take sides off and use for the rice, etc. Out here, we need the dump truck—we have a lot of rocks and fines, etc., to haul... it will also relieve the tractors as they can be used in agriculture so they should be for sheet parts.

It was pointed out that using tractors to do truck work in the wet, when it is dry and we need the tractors on the land, they are broken down and in need of repairs... from abuse.

House in town
Hugh Packs mentioned that the trucks in town are being shabbily maintained. Trash left in them, and tearing them up like we have done the pickup out here. THIS SHOULD BE STOPPED.

Dad said that money CAN be made on the trucks, and that someone should be deciding to go in and make that money. We will have to go in and get it set up—then Crenshaw will arrange that.

K.K.
Ujama said he had contracts with the rice board, with John L. and with another and with none of the trucks that haul containers... you get $100 per container for hauling them...

It was mentioned a survey should be done. 486-3-26.
Gene commented that the ability to put the tractors on our land makes the difference—for instance, without tractors we can plant 50 banana trees a day. With tractors, we can plant 50 an hour with aid of 2 tractors. This is a major production difference. Considering the value of what has been produced by the machines in the time, taking a load of something somewhere, and planting 50 trees, is a significant monetary consideration.

Dad in reading from analyst's notes—commented that Carol Dennis should put thru followup with Georgetown. They are to be checking on draft animals for us. What is available in the very heavy draft animals? Such as oxen, jackasses and donkeys, heavy duty horses. Look also for pair of horses that are same size for hauling carts and trailers.

Reading Jan's report—Dad commented that she should proceed to get the pineneeds that were offered. Wants her to try it soon, this from analyst's minutes of last week. Decided yes on the peanuts to be traded for other variety.

Movies—Dad wants the Hollywood movies returned—must get them back.

Do's and don'ts—when we have visitors:
In addition to list given last week, we don't believe in suicide:

No one censors our mail.
Are eliminating illiteracy; down to 1-2% from several dozen.
Have protein in every meal. Balanced diet with fresh vegetables.
Don't whip, spank and certainly do not bury in boxes.

Dad wants the band to play Sunday; must keep in practice.
Dad doesn't preach here—gives us news from all stations.
We are not pro-anything, not pro-soviet, nor pro-Chinese.
Are open and realize that peaceful co-existence and detente are important; live peacefully with each other.

Have a deep regard for life.
We don't tease, make fun; there is no sexism, sexism.
Women are not stereotyped in careers—none are stereotyped.
No elitism or special privileges.
Jim is the administrator. Believes in strong physical work in which everyone helps.

Music—Dad wants music to be played in the library.

Gold—Dad commented he wants information on turning our money into gold and get it done.
Fish to followup on this. (Note—sent word to Buford in radio room: will followup Saturday)

Compost—Russell gave part of his compost report. Dad wants it given again in tape form on the radio tomorrow.

PARALLAX VIEW: Dad mentioned guest is coming. PARALLAX VIEW MANDATORY FOR ALL.

Road—Dad got it done quickly, said Dad. Christian said it will take a week and a half, depending on how fast they bring in the logs. Stephen is cutting them. We are short on that kind of timber right around here. Stephen has the f of logs needed.
and Mike T says that we can get them in okay...
Stephen said it is rough cutting when it rains, because he has trees falling on him, etc. But will try to get it done.

Farmer Report
Darrell reported:
Grass was cut for horses and bull and 16 cows. The 11 and 2
litter pigs are let out daily for exercise and sunlight.
They are being totally through fed with sugar added to the
feed for more consumption. It works -- they eat more feed.
The inspectors checked the baby pigs and report that they
look healthy.
The baby chicks were getting out of their pen; Keaton
reported he would get right on it and put clay up around
the door. Chicks are doing well ON THE PIG FEED.

Pig Feed &
Chickens...

Slaughter
There were four pigs slaughtered Wednesday and that night.
Also during the night the generator went out. We also lost
2 pigs, because the sow sat on them. Now we have 17 pigs.
Rob also had some problems due to the generator going out.
We have assigned Earnest Johnson and Danny Scott to check
the generator. END OF REPORT.

Model Cottages
From the followup we learned that the six model cottages
are not yet ready for the guests to look at... THESE
MUST BE COMPLETED WITHIN ONE WEEK.

Dad said both the logs must be in and the cottages completed
within this one week. TRY TO FINISH THE ROAD BEFORE THE
EQUIPMENT USED THAT AGAINST US IN THEIR ARTICLE.

Rice fields
We have another field that is heading up now and the youth
going in and making noise have been able to keep the
wheat away fairly successfully.

Macrame & paintings -- Dad had wanted these up. Someone is to see that these
are hung about for beauty when the guests arrive... (Tanya) (Shenda) (Ruby) Peter and Nancy could be on this.

Landscaping
Chaikin is nearly complete with what Dad requested...said
with the weather allowing, he will be finished this week,
including the vegetable area.

Sun Bottles
Johnny and Lee are only ones that mostly go in -- WIC people. It
might look and see what is available...if any. However the
BAMBOO cups might be a better way to go. Ask Ken Norton and
Tom Grubb to get together on this. Committee to help ON THE
OWN TIME...

Bob Davis, Pat, Brenda Jones, Alfred Harch, Ardieno
Robinson, Ed Ford, Anthony Ricks, Patey Dennis,
Chris Norrell, William Jones, Maurice Anderson, Steve
Addison, Louise Shavers, Nicki Mitchell and James Ford.

Profiles
Ava has assigned someone to handle these.

Tea
Joyce T says she needs some help... Dad asked for a group
TO VOLUNTEER: Olilia Smith, Rose Swelton, Marcus Anderson, Maurice, Constance Jones, Tami Jones, Maricarta, Birdy, Arnold, Lou Esther Louis, Alfred James, Dorothy Rawlin.

Dad went over analysts minutes. He noted they talked of not planting the beans and was very upset at the idea. Jem said it was a matter of the weather and timing. (Johnny should perhaps check further on this. This was relative to the cuban black beans.)

SMILING

ALL ARE TO SMILE CONSTANTLY AND BE FRIENDLY. IT IS OUR SOCIAL DUTY! H ProgressDialog is a manipulation for attention.

Dad also went plants around the walls of the 6 model cottage.

TO GUESTS

MORE ON WHAT TO SAY TO GUESTS:

Our families live together, strong nuclear family. We encourage husbands and wives to share in the responsibility. We have all types of sports, chess, cards, movies, band, etc. We don't drink and don't believe in smoking. Not for moral reasons but for health reasons. First, and second, we cannot see spending our collective funds on such items. There is no crime in our community. We believe in the principle of cooperative living and in the days of the new testament.

We correct by denying privileges when people do wrong. We don't believe in suicide. It is a selfish act. Makes others feel rejected and leaves whatever job you were doing for someone else.

Rule about smiling: ALL ARE TO SMILE.

The chair is to be shown along with the broom when our guests come in.

Cleve and Helen are to go to town. Cleve has to go to the boat. Richard is preoccupied with Janaro. Cleve and Helen get in there. Dad wants something done—train Philip for Captain and Solomon for Engineer. Last $10,000 but can get gone in another contract. Breakdown on boat due to carelessness and Richard too imminent. Cleve went on board and declared he was the owner and get them to hustling. He is to get the part repaired and get it back into town.

Dad wants black cat caught and castrated—picks on the other Toms.

Get the map of sight plan up on the wall.

100 crates coming in; must work all night to build a warehouse, Dad said.

C-8-a-28d
AGRICULTURAL & LIVESTOCK COMMISSION

1 August Tuesday 7:30 PM

Chairperson: Harold Bogue
Secretary: Tish Lercy

1) BEAUTIFICATION OF JONESTOWN -- Vernetta Christian
2) Herbal Department: Experiments -- Fernestine March
Research -- Shirley Fields
3) Composting Problems -- Russell Noton
4) Intensive Farming -- Gene Chaikin
5) Report from Farm Manager -- Jack Bean

FOLLOW UP:

1) Report on the progress on the road -- Rob Christian

2) Has construction begun on the new cottages?

3) What is happening with the rice fields -- are the crows under control and has the noise helped?

4) A large Guyana flag was located in JONESTOWN -- Tom Grubbs has it secured in the book depository.

5) Did we get more macramé and paintings started for our decorations in pavilion and around Jonestown? And are the flowers being set out as requested around Vegetable area?
1 August 78
RALLY FOLLOWUP LIST

1) Gaston, Chief officer of Natakan will be here tomorrow. Wants the list of skills of our people.

2) Russell to read his report over the radio at mid-day tomorrow.

3) Run bottles to be collected from Kaituma; we have a glass cutter and can cut them into usable cups and glasses.

4) Day-off ceramics project; Tom Grubbs wants us to try making cups etc. Someone should be in charge of the volunteer project.

5) Counseling: is to be done with Teddy and the Karate team and the jury is to sit in on it and act. The team is to tell him how they do not appreciate his actions and how it is a reflection on the entire team and on the family.

Said that people on the job laugh at his jokes too much. Should not laugh at the jokes of people not working well. Is not helpful to socialism. Character should be first.

If guilty he should go to F.S.U. for a time...

6) Ava is to assign someone to be in charge of doing profiles on those to be cleared to go into town. EXCLUDE THE PACK No more last minute requests to send people in. He is asked as late as 9 am to send someone out at 7 am. Not to happen in the future.

Medical and dental and any others get information to Ava immediately when you know you NEED to send someone into town. She is to start getting their profile collected right then, and to give to Dad so he can have time to evaluate if they should be cleared to go in.

7) When Dad is on microphone, (CAUTION) be sure the radio does not interfere particularly when he is recording tapes. It bleeds thru and it is hard enough to concentrate on so much as must be done on those. BE SURE THEY DO NOT INTERFERE WITH HIS NEWS! Tell them to be ATTENTIVE when Dad is making a broadcast.

8) On next test we talk about what we got out of Carolyn Kirstendoll's letter; it is to be read again (probably after Wall leaves) across the P. A. system, just as she wrote it...what she wrote to Dad and about herself analysis and what it means in collective terms and in communist conscience.

9) Observe and report on any you see who are lazy or who let others do all of the shit work.

10) Dad wants the kitchen cleaned out... Wants tea for all, even if it means a night dishwasher and a senior to monitor so that the cups do not leave! Those typing and working late are to have tea...something is to be worked out.

11) If asked what we believe: we are peace loving people and believe in communal living. If asked about reincarnation, etc., we don’t talk about it.
about our religious beliefs... that is a personal matter and we do not all have the same religious beliefs... but we do not talk about them.

12) Tony Linton to be reviewed in 3 weeks relative to becoming a regular P. S. U. worker. He is assigned to the farm work pool at this time. Dad will entertain his request if he has an excellent record. Not to be considered a precedent... must always consider this type of thing individually. Those going on or off P.S.U. are not to dictate what they want to do or where they want to go.

13) [NEW LAW] Anything that endangers lives will be automatic P.S.U. anything that can endanger life and limb... dad said.

14) Jury Dad wants a place set up in each room where the jury has permanent down-front seating so that they do not have to stand as they deliberate.

15) Norman: letter given him by Edith Rollor; she wanted mailed in Caracas... ask him when he gets here.

Set up observers to watch him and anyone with whom he talks. He formerly spent a lot of time in back kitchen area and when the planes of National Enquirer flew over, it showed concentrated interest (apparently) in that area... Best to set up a careful watch in that area.
AGRICULTURE MEETING
AUGUST 1, 1978
PEOPLES RALLY

PLAYGROUND: IT IS FELT THAT THE PLAYGROUND STILL IS NOT SAFE. SUCH THINGS AS THE BARREL AND THE SWING SHOULD BE FIXED OR TAKEN DOWN. WILL GRADY IS WORKING ON GETTING IT TOGETHER AND WILL GET IT WITH ALTSCHATTER ON HIS IDEAS OF FIXING THE SWING.

SHOWERS: TO HAVE CULTURES TAKEN EVERY FEW DAYS ON THE FLOOR. (THIS IS THE KITCHEN BY THE CENTER) SELECTED PEOPLE WITH FEET ROBBERS WILL BE ICKED TO USE THE SHOWERS AS TO TRY AND DETERMINE THE CAUSE OF THE ROBBERS. THIS IS PART OF AN INTENSE FOOT STUDY. OTHER THINGS TO BE DONE ARE: SENDING SOMEONE WITH ALTSCHATTER INTO CBN FOR TESTING. A LETTER IS BEING WRITTEN TO TROPICAL SCIENCE TO SEE IF THEY HAVE ANY INFORMATION ON SUCH ROBBERS AS WE HAVE BEEN HAVING. TO: GRUBES SUGGESTED MIXING ASHES WITH CASSAVA POWDER FOR PEOPLE TO WEAR IN THEIR SOCKS. HE SAID THE ASHES HAS HELD HIM IN THIS MANNER AND IT MIGHT BE GOOD FOR OTHERS. THE METHOD WILL BE TRIED.

TEACUPS: IT WAS DISCUSSED ABOUT TEA BEING DRUNK AT NIGHT AND THE PEOPLE WALKING AWAY WITH THE CUPS AND THEN DISAPPEARING. PEOPLE NEED TO DRINK TEA AT NIGHT WHEN THEY WORK LIKE THEY DO. ROTHER ALSO BROUGHT UP THAT NO CONTAINERS SHOULD EVER BE TROGEL AWAY. THAT THEY CAN ALWAYS BE USED FOR ONE THING OR ANOTHER. POSSIBLE SOLUTIONS TO NOT ENOUGH CUP'S PROBLEM: USING THE TIN CANS (AS MANY DO NOW) AND TOY SUGGESTED GOING INTO KUTUMA AND PICKING UP BOTTLES AND CUTTING THE NECKS OFF SO THEY CAN BE USED AS GLASSES AND CUPS BOTH. WE HAVE A TOOL THAT CAN CUT THE GLASS. HE ALSO SUGGESTED MAKING CERAMICS AND POTTERY TO MAKE OUR OWN. JOHNNY JONES SAID THAT AT THIS TIME THERE IS SO MUCH GOING ON THAT THIS WOULD HAVE TO BE TABLED FOR AWHILE (OR CERAMICS) BUT THAT MAYBE SOME COULD GO OUT ON A DAY OFF AND LOOK FOR BOTTLES. NEED MORE PEOPLE TO VOLUNTEER TIME NOW TO GET OTHER PROJECTS DONE.

AGRIC: IT WAS MENTIONED AGAIN THAT DEPTS NEED TO TRY AND GET MORE PEOPLE OUT INTO AGRIC. ALSO THAT SUPERVISORS OF AGR. CREWS DO NOT TURN REPORTS IN ON TIME AND THAT THEY BETTER START DOING IT RIGHT.

THERE WAS NO PROBLEMS IN AGRIC. THAT NEEDED TENDING TOO.
A couple of reports on how to make composting and one about herb gardening was to be given but it was asked that they give it over the P.A. sometime thru the week.

Dad also mentioned that the wrong emphasis is put on work. That the old concept is the leader should not work and when he was doing some logging the other day some told him that he shouldn't do it. He said that it is the best thing for him when he can do hard physical labor and that the leader should work when he can. He asks that nobody try to stop him when they see him doing work.
